Tutorial Varnish Cache Cara Mengabaikan Cache Control

Berdasarkan catatan kami varnish dapat mengabaikan cache control sehingga semua halaman dapat dipaksa untuk di cache oleh varnish. Adapun caranya adalah berikut ini :

```
unset beresp.http.Cache-Control;
set beresp.http.Cache-Control = "public";
set beresp.http.Cache-Control = "max-age=604800"; // cache selama 7 hari
```

Jika anda menggunakan varnish cache 4, script tersebut diatas diletakkan pada “sub vcl_backend_response”
