# Cara Memasang Google Webmaster Console Di Wordpress

Artikel ini membahas tutorial cara mendaftarkan website berbasis wordpress ke google webmaster console. Mengapa perlu? Karena terdapat beberapa hal penting mengapa anda harus memasangnya. Adapun diantaranya :

1. Anda bisa memantau statistik kunjungan website

dengan melihat data tersebut anda bisa dengan segera mengetahui apakah pengunjung mengalami peningkatan ataupun malah penurunan.

2. Anda bisa melihat kata kunci dari mana kunjungan itu berasal

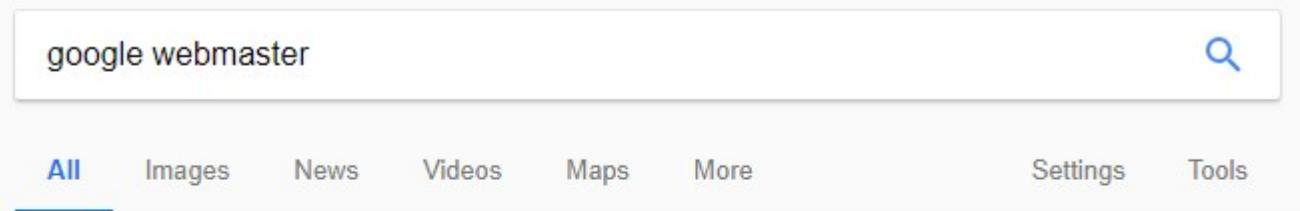

Queries	↓ Clicks	Impressions
pusathosting	916	1,081
pusat hosting	506	672
aan	211	899
c	181	1,720
c	150	247
c	140	987

dengan melihat data kata kunci tersebut anda bisa melakukan optimasi website pada kata kunci yang lemah sehingga kunjungan menjadi lebih banyak.

Sebagaimana semua kita tahu bahwa kunjungan itu sama dengan penjualan. Artinya semakin banyak orang yang mengunjungi website anda maka kemungkinan besar semakin banyak orang yang akan membeli atau menggunakan produk anda.

## Login ke Google Webmaster Console

Silahkan login ke google webmaster console. Jika anda tidak mengetahui url google webmaster console maka anda cukup ketik di google seperti ini.

A screenshot of a Google search results page. The search query "google webmaster" is entered in the search bar. Below the search bar, there are tabs for All, Images, News, Videos, Maps, More, Settings, and Tools. The "All" tab is selected. The search results show approximately 132,000,000 results found in 0.32 seconds. The top result is a link to "Google Webmasters - Resources to Track Website & Search ...". The URL is <https://www.google.com/webmasters/>. A dropdown menu is open next to the URL, showing options like "Open in new tab", "Copy link address", "Copy link", "Bookmark", "Search history", and "Search history". Below the link, there is a snippet of text: "You want to be found and we want to help. Track your site's search performance with Google Search Console and our additional webmaster resources." To the right of the snippet, there are four blue links: "Search Console", "Search Console Help", "Support", and "Learn". Each link has a corresponding snippet below it. At the bottom of the snippet area, there is a link "More results from google.com »".

google webmaster

More results from google.com »

Kemudian klik "Search Console"

The screenshot shows the Google Webmasters landing page. At the top, there's a navigation bar with links for Home, Support, Learn, and Connect. Below the navigation is a large illustration of a person in an apron standing behind a counter, holding a laptop displaying a website. To the left of the illustration is a speech bubble containing a snippet of search results from Google. A video player icon with the text "View an introduction to Search Console" is also present. On the right side, there's a call-to-action button labeled "SEARCH CONSOLE" and a "GET HELP" link.

dan Login

Setelah login anda bisa klik tanda segitiga dibagian kiri atas seperti ini

A screenshot of the Google Search Console interface. At the top, there's a dark header with the text "Google Search Console" and a "BETA" badge. Below the header, there's a search bar with the URL "https://pusathosting.com/" and a dropdown arrow icon. The main area shows a table with two rows. The first row has a blue square icon and the word "Status". The second row has a grey square icon and the word "Status". A vertical scroll bar is visible on the right side of the table.

## Add Property

Kemudian klik add property, perhatikan gambar dibawah ini

The screenshot shows the Google Search Console interface. At the top, there's a dark header bar with the text "Google Search Console BETA". Below it, a navigation bar has "Search property" on the left and "Status" on the right. A dropdown menu is open under "Search property", listing two properties: "https://pusathosting.com/" and "http://pusathosting.com/kb/". At the bottom of this dropdown is a button labeled "+ Add property". A cursor arrow is positioned over this button. Below the dropdown, there's a small section titled "Mobile usability".

## Isi Lengkap URL

Selanjutnya anda isi lengkap url website anda

This screenshot shows a modal dialog box with a dark header bar containing the text "Add property". Below the header is a text input field labeled "Add site URL" with the value "http://www.jasamaintenanceweb24.com" entered. At the bottom right of the dialog are two buttons: "CANCEL" and "CONTINUE".

Use the exact address of your property - For example, http:// and https:// are counted as different properties. [Learn more](#)

CANCEL CONTINUE

## Verifikasi

kemudian selanjutnya pilih metode verifikasi.

Untuk wordpress self hosting biasanya kami sarankan menggunakan metode verifikasi meta tag.

Perhatikan gambar dibawah ini :

[HTML tag](#)[Add a meta tag to your site's home page](#)

1. **Copy** the meta tag below, and paste it into your site's home page. It should go in the <head> section, before the first <body> section.

```
<meta name="google-site-verification" content="N6usjICHPnA3YyfqRaZ4rjtMdWQsjICFq4I4CRY3mEM" />
```

2. Click **Verify** below.

To stay verified, don't remove the meta tag, even after verification succeeds.
