# Mencegah Email Spoofing / Phising Directadmin

Jika anda mendapatkan email yang seolah dari email anda tapi ternyata tidak maka itu disebut email spoofing atau phising. Solusi yang bisa diimplementasikan adalah menggunakan spf, dkim, dmarc dan easy\_spamfighter sekaligus mengaktifkan ini

```
nano /etc/exim.acl_check_message.pre.conf
```

Tambahkan

```
deny
  authenticated = *
  condition = ${if or {{ !eqi{${domain:$authenticated_id}}
${sender_address_domain} }\
                    { !eqi{${domain:{$authenticated_id}}
${{domain:{$address:$header_From:}} } }\
                    }\
  }
  message = Your FROM address domain ( $sender_address_domain ) must match
your domain name used in authenticated email user ( $authenticated_id ).
```

dan restart exim

```
service exim restart
```
