# Script Update Directadmin

Berikut ini adalah script untuk update directadmin yang apabila tidak bisa login disebabkan versi yang sudah usang

```
CHANNEL=current
# can be one of: alpha, beta, current, stable
OS_SLUG=linux_amd64
# can be: linux_amd64, rhel8_amd64, rhel7_amd64, debian10_amd64, ...
COMMIT=$(dig +short -t txt "$CHANNEL-version.directadmin.com" | sed
's|.*commit=([0-9a-f]*\).*|\1|') # can be commit hash literal value
if you want specific build to be installed
FILE="directadmin_${COMMIT}_${OS_SLUG}.tar.gz"
# creates download package name from the variables above

curl --location --progress-bar --connect-timeout 10
"https://download.directadmin.com/${FILE}" --output "/root/${FILE}" #
downloads given directadmin build into /root dir
tar xzf "/root/${FILE}" -C /usr/local/directadmin
# extracts downloaded package to /usr/local/directadmin
/usr/local/directadmin/directadmin permissions || true
# runs post-upgrade permission fix step
/usr/local/directadmin/scripts/update.sh
# runs other post upgrade fixes
service directadmin restart
```
