Exim System Filter Memblokir Email Tujuan 1

Exim System Filter Memblokir Email Tujuan

Berikut ini adalah string exim sistem filter untuk memblokir email tertentu berdasarkan pengirim atau tujuan

```
#Custom exim block for specific users $date
if $header_from: contains "user@domain.tld" or $header_from: contains
"user2@domain.tld" and
$header_to: contains "@gmail.com" or $header_to: contains "@outlook.com" or
$header_to: contains "@hotmail.com" or $header_to: contains "@yahoo.com"
then
fail text "This message is not able to be sent to the destiation due to your
server configuration. Please speak with your server administrator."
seen finish
endif
```

Memfilter berdasarkan tujuan saja

```
if ("$header_to:, $header_cc:" contains "@yahoo.com")
then
fail text "Email to this mail address is temporarily blocked by the
Administrator"
seen finish
endif
```
