Tutorial Flush DNS Cache di Windows dan Linux Ubuntu/Mint

Berikut ini adalah cara untuk mereset cache dns di windows dan linux Ubuntu / Mint.

Windows

Untuk reset cache dns di windows cukup jalankan command prompt yang bisa ditemukan di menu start kemudian cari "cmd" selanjutnya ketik

```
ipconfig /flushdns
```

```
Administrator: Command Prompt
Microsoft Windows [Version 10.0.19042.1586]
(c) Microsoft Corporation. All rights reserved.

C:\WINDOWS\system32>ipconfig /flushdns

Windows IP Configuration

Successfully flushed the DNS Resolver Cache.

C:\WINDOWS\system32>
```

The screenshot shows a Windows Command Prompt window. The command `ipconfig /flushdns` is entered and executed. The output is `Successfully flushed the DNS Resolver Cache.`. Two red arrows are drawn over the image: one points from the text "Command" to the command line, and another points from the text "Response" to the output line.

Linux

Untuk reset cache dns di linux mint silahkan buka command dan jalankan

```
resolvectl flush-caches
```

anda bisa melihat **resolvectl -help** untuk melihat daftar perintah lainnya.

Selamat mencoba reset cache dns di windows dan linux ini semoga bermanfaat.
