Mendapati ERror mount.nfs: Operation not permitted 1

Mendapati ERror mount.nfs: Operation not permitted

Kami mendapati error pada server nfs "mount.nfs: Operation not permitted" kemudian di log error "rpc.mountd[7968]: refused mount request from 157.245.206.9 for /xxxx/xxxdts (/xxxx/xxxdts): illegal port 24479"

Solusinya menambahkan "insecure" pada /etc/exports

```
/xxxx/xxxdts 157.245.206.9(rw, sync, no_root_squash, no_all_squash, insecure)
```

silahkan mount ulang.

Insecure ini artinya menggunakan port diatas port standar Penjelasan ada disini

https://access.redhat.com/documentation/en-us/red_hat_enterprise_linux/6/html/security_guide/sect-security_guide-securing_nfs-mount_options
