# Membuat Pip3 Environment

Python keluar error WARNING: Running pip as the 'root' user can result in broken permissions and conflicting behaviour with the system package manager. It is recommended to use a virtual environment instead

solusi membuat enviroentment

```
python3 -m venv .venv
```

aktifkan

```
source .venv/bin/activate
```

cek confirm

```
which python
```

pastikan lokasinya sudah di folder tsb.
